

## Coogee Bay Road Streetscape Upgrade, Coogee NSW

Randwick City Council recently made improvements to Coogee Town Centre to make the area more pedestrian friendly. The upgrade included removing overhead power lines, widening footpaths and installing new pavers, trees and street furniture to encourage visitors and residents to gather and interact in the space.

### Project Design Brief

Designers wanted to incorporate several kerb extensions along Coogee Bay Road to provide more room for pedestrians, landscaping and public seating. However, the inclusion of these extensions meant there was more surface area to drain. Water needed to be removed efficiently and the drainage system would need to meet several legislative requirements to ensure pedestrian safety.

### ACO's Solution

- **KlassikDrain** KS300 with Stainless 5 Star **Heelsafe**® *Anti-Slip* grates

### Benefits

- The Stainless 5 Star **Heelsafe**® *Anti-Slip* grates provide a slip resistance rating of P4/R11 to AS 4586
- The Stainless 5 Star **Heelsafe**® *Anti-Slip* grates has a slot opening of 6mm wide making it suitable for pedestrians as well as wheelchair and walking cane compliant to AS 3996
