Midland Railway Square, WA

Railway Square is a new civic place linking the historic 20th Century Industrial Railway Workshop buildings with a new urban village. The area is a mix of old and new; residential and commercial buildings and open public spaces.

Project Design Brief

- To provide a drainage system capable of collecting all the surface water runoff from a flat pavement
- Provide a grate design which is aesthetically compatible with the historic industrial theme of the site

ACO's Solution

- K200 trench drainage system with modular channels configured to produce a sloped run
- Iron Wave Heelsafe® *Anti-Slip* grates

Benefits

- Sloped channels with 0.5% built-in fall allows for efficient drainage on flat pavements
- Cast steel edge rails provides a visual restraining edge for the pavers
- The grate design is in keeping with the industrial theme of the area

Other ACO Products Installed

- Ductile iron access covers
- Cable pits
