

## WA Athletics Stadium, Perth

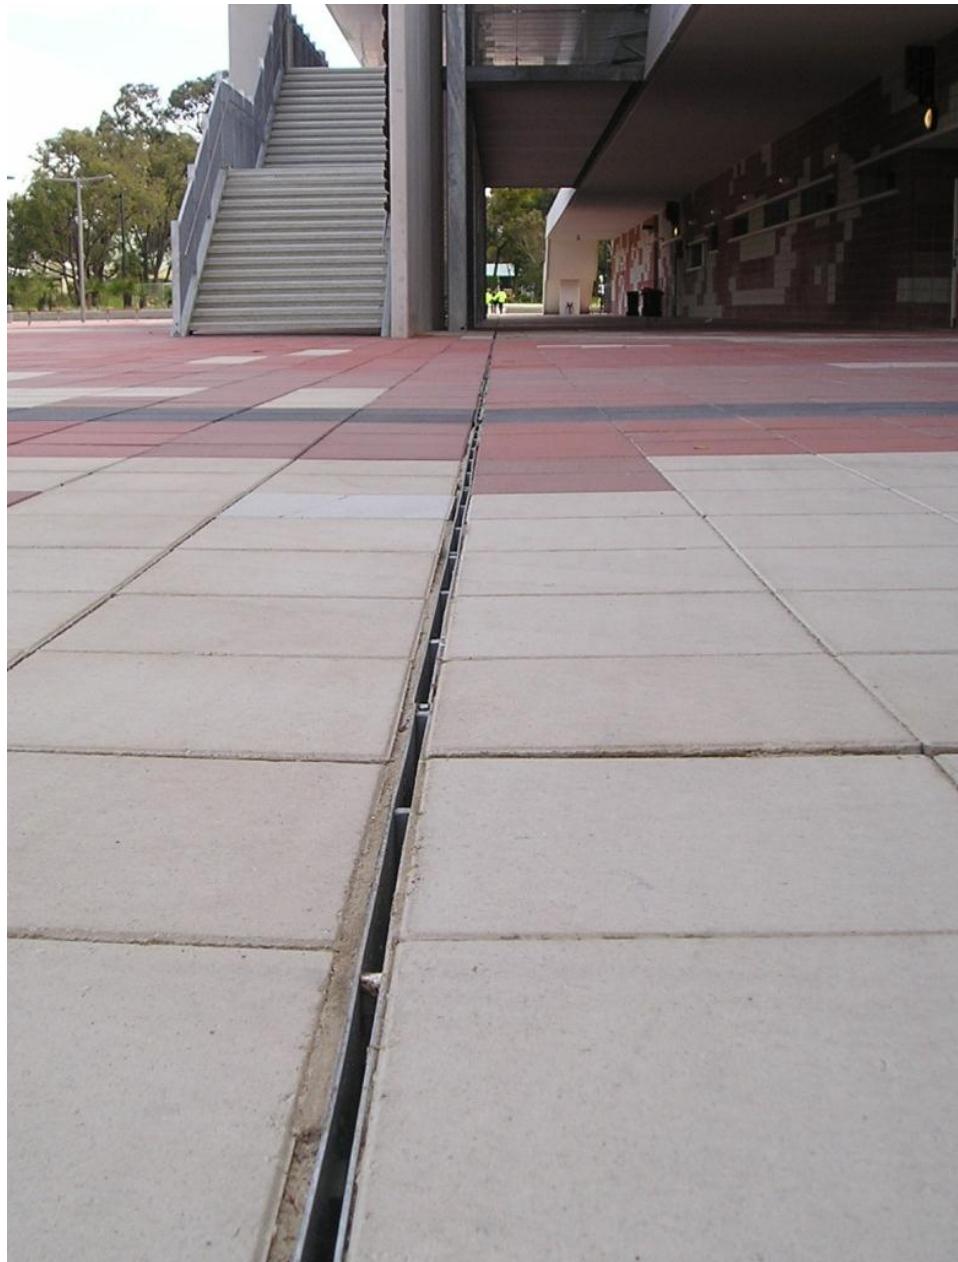

*The new Western Australia Athletics Stadium at AK reserve is a 10,000 capacity world class venue featuring a 2000 seat grandstand. Designers selected large square pavers for the hardstand area behind the grandstand where a discrete surface drainage system would be required.*

*ACO's AS 1428.2 compliant Brickslot was therefore specified. Brickslot is an unobtrusive drainage system with a slotted frame. The linear trench drain was purposefully positioned in line with the paving grid to allow for visual continuity of the pavement. The sloped nature of the underlying Polycrete® Channels provides efficient drainage as well as direct the captured stormwater towards the nominated outlets along the run.*
